REPORT ON GREEN CAMPUS INITIATIVES

A Green Campus at Vikas Group of Institutions means combining eco-friendly practices with educational efforts to encourage sustainable habits. This helps our institution lead the way in changing how we think about the environment and finding new ways to solve environmental, social, and economic problems.

At VGI, we believe making our campus green involves getting rid of wasteful practices, using renewable energy sources for power, properly disposing of waste, buying eco-friendly supplies, and recycling effectively. The institute's leadership is committed to setting deadlines for these green initiatives and integrating them into our planning and budgeting processes. We want everyone at VGI, whether student, faculty, or staff, to join in creating a campus that's clean and sustainable.

Major Green Campus Initiatives in VGI are as follows

1. Installation of Solar Power Stations
2. Implementation of Waste Water Management/Rainwater Harvesting Systems
3. Maintenance of Water Bodies and Distribution Systems on Campus
4. Promotion of a Plastic-Free Campus Environment
5. Tree Plantation Drives
6. Exclusive use of LEDs for lighting
7. Establishment of Digital Libraries
8. Transition to electronic communication methods, reducing paper usage
9. Adoption of paper-saving practices for day-to-day tasks
10. Minimization of chemical fertilizer and pesticide usage in favor of on-site composting
11. Selection of environmentally friendly cleaning products
12. Implementation of waste segregation systems with separate bins for biodegradable and non-biodegradable waste
13. Up cycling classroom furniture to reduce metal waste
14. Provision of incinerators in women's restrooms for sanitary napkin disposal
