## ANNUAL REPORT ON E-GOVERNANCE

Vikas Group of Institutions has embraced e-governance as a means to enhance transparency, efficiency, and stakeholder participation in managing information and human resources. Through the implementation of Enterprise Resource Planning (ERP), the institution has effectively divided its focus into two main realms: e-administration and e-services. E-administration leverages Information and Communication Technology (ICT) to streamline information processing and decision-making processes across the institution's governing body, administrative leadership, Internal Quality Assurance Cell (IQAC), and various decentralized committees. This approach facilitates decentralized administration, ensuring that decision-making is distributed among relevant stakeholders. On the other hand, e-services encompass a range of facilities aimed at providing seamless service experiences to staff and students alike. With a majority of the institution's personnel and students equipped with smartphones, the institution leverages modern technological advancements in higher education to deliver these services effectively. By utilizing contemporary technologies and fostering a culture of participation and accountability, Vikas Group of Institutions stands at the forefront of modern educational administration, ensuring that stakeholders are empowered to contribute meaningfully to the institution's operations while benefiting from efficient service delivery mechanisms. The institution continues to prioritize the provision of quality education through a robust ERP strategy. Implementation of foolproof plans for quality assurance remains a key objective of the institution.

WEBPROS Solutions PVT. LTD. was chosen through a tender process to implement e-governance across various administrative domains of the Institution. This involved automating tasks such as student attendance management, maintaining the student database, and recording examinations and continuous assessments. At the institutional level as well as within each academic department, dedicated WhatsApp groups have been established to facilitate the sharing of orders, information, directives, and discussions on a unified platform.
