About the Institutions

Vikas Group of Institutions established in the year 2010 one of the best known self-financing Integrated educational Institutions aiming to provide excellence in Engineering, Pharmacy and Management studies. It is governed by Mother Theresa Educational Society to encourage aspiring students with very good Academic record. It offers Under graduate Engineering (Civil, EEE, Mechanical, ECE, CSE, and Agriculture) and B. Pharmacy along with PG M. Tech (CSE, VLSI, DECS, EPS, SE and TE), M. Pharmacy (Pharmaceutics, Pharm. Analysis and Pharmacy Practice) and MBA. It has a strong Industry-Institute partnership, Entrepreneurship cell and R&D cell to enhance the practical knowledge of the students.

About the Institute

Vikas Group of Institutions established in the year 2010 one of the best known self-financing Integrated Institution aiming to provide excellence in Engineering, Pharmacy and Management Studies. It is governed by Mother Theresa Educational Society to encourage aspiring students with very good Academic record. It offers Under graduate Engineering (Civil, EEE, Mechanical, ECE, CSE-AIML, DS and Agricultural) and B.Pharmacy along with PG M.Tech (CSE, VLSID, DECS, EPS, SE and TE), M.Pharmacy (Pharmaceutics, Pharm.Analysis and Pharmacy Practice) and MBA. It has strong Industry-Institute partnership, Entrepreneurship cell and R&D cell to enhance the practical knowledge of students.

Program Outcomes

The main objective of this training program to expose the participants to various modeling, design techniques, applied to contemporary problems in the field of Electronics and communication Engineering.

Program Objectives:

1. Knowledge in Microprocessor meters starting from basic components
2. Knowledge on properties of Meter reading equipment
3. Knowledge on all Real time thermal rating systems
4. Knowledge on Electromagnetic signature measurement/analysis properties and classification

PROGRAMME REPORT

- Name of the Programme** : Research and Developments in **Cryptography and Network Security**
- Date** : 05-02-2020
- Details of Resource Person** : Mrs.B.Sunitha M.Tech
Assistant Professor
Andhra Loyola Institute of Engineering and Technology
Email: suneetha.m.tech7@gmail.com
Contact No: 9553622568
- No. of students enrolled** : 38
- Objective of the Programme** : The objective is it ensures the identity of the person trying to access the information. The authentication is mostly secured by using username and password.
- Topics covered** : Confidentiality and Authentication
System Integrity and Data Integrity
Non-Repudiation and Access control
Issues of ethics and law
- Learning Outcomes** :
 - Understanding of Cryptographic Principles: Students will grasp foundational concepts in cryptography, including encryption algorithms, cryptographic protocols, and cryptographic techniques, enabling them to analyze and design secure systems.
 - Proficiency in Network Security Mechanisms:

Learners will acquire skills in implementing network security mechanisms such as firewalls, intrusion detection systems, and secure authentication protocols to safeguard against unauthorized access and data breaches.

- Ability to Evaluate Security Risks: Participants will develop the ability to identify, assess, and mitigate security risks in network environments, considering factors such as vulnerabilities, threats, and attack vectors.
- Application of Cryptographic Techniques: Through practical exercises and case studies, students will apply cryptographic techniques to secure data transmission, authentication, and integrity verification in real-world scenarios.
- Ethical and Legal Considerations: Students will gain an understanding of ethical and legal issues related to cryptography and network security, enabling them to navigate complex compliance requirements and ethical dilemmas responsibly.

Object of Program:

- Objective of the seminar is to create awareness about IPRs, especially patents and copy rights among students, to guide researchers/inventors in respect of patenting their inventions & to provide insight into practical applications of IP such as patent drafting, patentability search and freedom to operate search, validity/invalidity search, and evidence of use analysis.
- To provide an awareness and hands on session on Intellectual Property Rights (IPRs) and deliver the Step by Step Procedure for Filing, Processing of Patent Application in Indian and International Patent Offices.

Topics Covered:

- Introduction to Intellectual Property Rights (IPRs)
- Introduction to Start up India Initiative & Recognition
- Forms of IPR
- IPR Laws in India
- Filing, Processing of Patent Application – Indian and International Patent Offices (PCT)
- Types of Patent Application
- Requirement and Forms to be submitted during Patent Application
- Precautions and Steps to be followed before filing patent application

Learning Outcomes

Object of Program:

- The objectives of Trademarks stand unparalleled in building Brand Recognition and ensuring Brand Protection for businesses in India and all over the world
- The objective of a Trademark extends not just to brand recognition but also brand protection.

Topics Covered:

- This law not just outlines the legal definition of Trademarks as discussed above, but also governs all other aspects of it, such as Trademark Registration, Trademark Rights, and Trademark Infringements. Let's look into the purpose of the Trademark law a little more deeply. This topics covered in classification of trademarks, trade mark law & it's purpose and objectives of a trademark.

Learning Outcomes

- Trademarks not only help distinguish products within the legal and business systems—but just as significantly—with consumers. They are used to identify and protect words and design elements that identify the source, owner, or developer of a product or service

KEY POINTS

- A trademark is an easily recognizable symbol, phrase, or word that denotes a specific product. It legally differentiates a product or service from all others of its kind and recognizes the source company's ownership of the brand. Trademarks may or may not be registered and are denoted by the ® and ™ symbols respectively. Although trademarks do not expire, the owner must make regular use of it in order to receive the protections associated

About the Institute

Vikas Group of Institutions established in the year 2010 one of the best known self-financing Integrated Institution aiming to provide excellence in Engineering, Pharmacy and Management Studies. It is governed by Mother Theresa Educational Society to encourage aspiring students with very good Academic record. It offers Under graduate Engineering (Civil, EEE, Mechanical, ECE, CSE-AIML, DS and Agricultural) and B.Pharmacy along with PG M.Tech (CSE, VLSID, DECS, EPS, SE and TE), M.Pharmacy (Pharmaceutics, Pharm.Analysis and Pharmacy Practice) and MBA. It has strong Industry-Institute partnership, Entrepreneurship cell and R&D cell to enhance the practical knowledge of students

Program Outcomes:

Trademarks not only help distinguish products within the legal and business systems but just as significantly with consumers. They are used to identify and protect words and design elements that identify the source, owner, or developer of a product or service

Program Objectives:

The objectives of Trademarks stand unparalleled in building Brand Recognition and ensuring Brand Protection for businesses in India and all over the world. The objective of Trademark extends not just to brand recognition but also brand protection.

PROGRAMME REPORT

- Name of the Programme** : A One day seminar on Research Trends in **COMPUTER AIDED DESIGN**
- Date** : 16-09-2019
- Details of Resource Person** : Dr.P.S.Srinivas, M.Tech, PhD, MISTE.,
Professor and HOD
PSCMR College of Engineering and Technology
Email: vasupragada@gmail.com
Contact No: 8977760339
- No. of students enrolled** : 36
- Objective of the Programme** : Enhance design efficiency: Streamline the design process to reduce time and resources required for creating accurate and intricate models.
Improve collaboration: Facilitate seamless communication and collaboration among designers, engineers, and stakeholders to ensure coherence and accuracy in design iterations.
Enhance visualization and analysis: Enable comprehensive visualization and analysis of designs to identify potential flaws, optimize performance, and enhance overall product quality.

Topics covered

- : CAD software fundamentals: Understanding the basic principles and features of CAD software, including user interface navigation, drawing tools, and file management.
- 2D drafting and drawing techniques: Learning how to create precise 2D drawings, including dimensioning, annotations, and symbol libraries, essential for technical documentation and schematic representations.
- 3D modeling and visualization: Exploring techniques for creating three-dimensional models of objects and structures, including surface modeling, solid modeling, and rendering for realistic visualization.
- Design optimization and analysis: Utilizing CAD tools for simulation, finite element analysis (FEA), and computational fluid dynamics (CFD) to optimize designs for performance, durability, and manufacturability.

Learning Outcomes

1. Proficiency in CAD software: Gain competency in utilizing CAD software tools for creating, editing, and manipulating 2D and 3D models effectively.
2. Precision in design documentation: Develop the ability to produce accurate and detailed technical drawings, including annotations and dimensions, essential for communication within engineering and manufacturing contexts.
3. Creative problem-solving: Enhance problem-solving skills by employing CAD techniques to conceptualize and iterate designs, addressing real-world engineering challenges efficiently.
4. Collaboration and communication: Improve teamwork and communication skills through collaborative design projects, fostering effective interaction with colleagues and stakeholders to achieve project goals.

Program Outcomes

The main objective of this training program to expose the participants to various modelling, design techniques, applied to contemporary problems in the field of Civil Engineering.

1. Efficient Design Creation: Enable users to swiftly generate accurate and detailed designs with intuitive CAD tools.
2. Enhanced Collaboration: Facilitate seamless collaboration among design teams by providing robust sharing and version control features.
3. Precision Engineering: Empower engineers to achieve higher levels of precision and accuracy in their designs, aiding in the creation of sophisticated products.
4. Streamlined Workflow: Optimize design workflows by automating repetitive tasks, reducing errors, and increasing productivity for CAD users.
